

CONTROL SOLUTION OVERVIEW

GENERAL OFFICE APPLICATION - To view more information on the components of our controls solution, please click on the respective product callouts.

Rooftop Unit Controller

- The Price Rooftop Unit Controller (PRTU) polls data from the network zone controllers and intelligently controls the packaged roof top unit.
- The ASHRAE standard BACnet option allows for advanced control and monitoring of a building system.

Remote System Access

- Access to the Price Web Server via the Internet.

Graphical User Interface

- Price Web Server pre-loaded with graphics for Price Controls.
- Access via any web browser with free ADOBE FLASH plug-in installed.
- No software or license (USB key) required.

Fan Powered Box with VAV Controller & Reheat

- Price's factory mounted and calibrated Price Intelligent Controller (PIC) for series and parallel fan power terminal units.
- Fan Powered Terminals allow for the use of local reheat even while the rooftop unit is turned off.

Duct Pressure Controller

- The Price PCV is designed as a pressure control valve to regulate duct pressure in a VAV or VVT system.
- The PCV uses a DDC controller to ensure that over or under pressurization of the duct will not occur.

VAV Diffuser

- PRODIGY® Smart Diffuser.
- Stand-alone or native BACnet MS/TP.
- Compatible with all Price thermostats.

Linkersoft2 Software & LCD Setup Thermostat

- Easy to use step-by-step setup and calibration software, dedicated to Price Controls products.
- Connect the LINKER2 USB cable into your service laptop, or Price provided LCD Setup Thermostat, and the RJ12 connection into the room's thermostat or controller service port.

Single Duct Terminal with Wireless Thermostat

- Wireless thermostat allows for convenient, wire free placement in any room, on any surface.
- Compatible with our factory mounted calibrated Price Intelligent Controller (PIC).
